

## HOW TO MAKE A FARM DISASTER KIT

Put together a disaster kit with what you will need on hand in the event of a disaster. Have the kit in a central location and let others know where it is. Regularly check to ensure that things are fresh and complete. Include emergency items then add items that you use every day:

- Current list of all animals, records of feeding, vaccinations and tests - available at several locations. Make sure that you have proof of ownership for all animals.
- Have temporary identification of your animals, such as plastic neckbands or large permanent markers to mark your animals with your name.
- Have a basic first aid kit.
- Handling equipment such as halters, cages, and tools for each kind of animal.
- Water, feed, and buckets.
- Tools and supplies.
- Emergency equipment such as a cell phone, flashlights, portable radios, and batteries generators.
- Other safety and emergency items for vehicles and trailers, gas, oil, chains and tools
- Food, water, and disaster supplies for your family.

Your local humane organization, agricultural extension agent, emergency management agency may be able to provide you with information.
