

What to do with

# YARD WASTE

Turn this . . .

Into this

## What is the best way to get rid of yard waste?

**Good:** Bring to the Highway Garage . NS has a separate yard waste cap with an over the cap fee of \$25 /ton – less than throwing into the trash where we pay \$32 /ton.

**Better:** Make a leaf pile in your yard and let it break down naturally. There are no transportation or tipping fees with this method.

**BEST:** Have a back-yard compost and add your yard waste with food and vegetable scraps. Not only is there no tipping or transportation fees, but you reduce your trash amount by removing this organic matter – And even better, you end up with rich soil for your gardens all for free!
